The Climate Emergency: What Land Has to Do With It

Land use and a post-carbon world

Anthony Flint | Senior Fellow | Lincoln Institute of Land Policy
October 17, 2023

“improve quality of life
through the effective use,
taxation, and stewardship
of land.”

Land in Conflict: Zoning Reform

Land in Conflict: The Clean Energy Transition

Land in Conservation

Since 2016, an average of 28 million hectares have been cut down every year -- one football field of forest lost every second around the clock.
theworldcounts.com

Land, Agriculture, and Water

WRI: To feed a growing population, agricultural land is likely to expand by 600 million hectares — nearly twice the size of India — by 2050. Clearing of forests – projected to be roughly the size of the continental United States.

Developers Help Foot Climate Resilience Bills in Boston

How the city uses land value capture to fund infrastructure projects that counter the impacts of climate change.

Land and Climate Finance

The screenshot shows the Lincoln Institute of Land Policy website. The header features the institute's logo and name over a background image of a dense urban area. A navigation bar includes links to 'Our Work', 'Publications' (which is underlined), 'Research & Data', 'Courses & Events', 'Endowment', and 'About'. Below the navigation bar, the breadcrumb 'Publications / Working Papers' is displayed. The main content area features the title 'Willingness to Pay for Climate Adaptation' in a large, bold font, followed by the subtitle 'International Case Studies on Private Developers' Preparedness to Contribute to Urban Climate Adaptation'. The authors are listed as 'Erwin van der Krabben, Alexander Lord, James H. Spencer, and Stephen Buckman'. The publication date and language are given as 'August 2023 | English'.
