

Conference At-A-Glance

Monday, October 19, 2020

8:45a – 10:00a Welcome & Introductions
Opening Keynote Session with Leo Vazquez

10:15a – 11:00a **Concurrent Education Sessions A**

11:00a – 11:15a Transition

11:15a – 12:00p **Concurrent Education Sessions B**

12:00p – 12:30p Lunch/Transition

12:30 – 1:30p **Concurrent Education Sessions C**

1:30p – 1:45p Transition

1:45p – 3:15p **Concurrent Education Sessions D**

3:15p – 3:30p Transition

3:30p – 4:45p **Concurrent Education Sessions E**

5:30p – 6:30p Healthy Communities in PA Networking
All are welcome to attend

Tuesday, October 20, 2020

8:45a – 10:00a	Welcome & Introductions Plenary with Cindy Dunn
10:00a – 10:15a	Transition
10:15a – 11:30a	Chapter Address & Awards
11:30a – 12:00p	Lunch/Transition
12:00p – 1:15p	Welcome Introductions Pitkin Lecture with Randall Arendt
1:30p – 3:00p	Concurrent Education Sessions F
3:00p – 3:15p	Transition
3:15p – 4:45p	Concurrent Education Sessions G

Featured Speakers

Leo Vazquez

Planning for the 2020's and Beyond

We enter this decade confronting two major challenges that incorporate and transcend land use – public health and systemic oppression. The skills and approaches we need to address them go beyond the traditional prescriptive and proscriptive ones taught to us in planning school. Planners need to become more adaptive and exercise underutilized leadership skills. And we can learn from a surprising source: local artists and cultural professionals.

Plenary with Cindy Dunn

Pitkin Lecture with Randall Arendt

Relevant Conservation Subdivision Design Examples from Other States

This session will present a variety of examples of conservation subdivisions from other states with climate terrain and landscapes like Pennsylvania. The range of densities will also be similar to those common in the Keystone State. This session will show examples attendees have not seen before.

Concurrent Education Sessions A

A1. Municipal Led Mobility Studies: Successes in Ferguson Township

CM | 0.75

As communities evolve, streets require attention to efficiently re-allocate space, address conflicts, and offer room for new priorities. This session will provide an overview of the Northland Area Mobility Study conducted in Ferguson Township, Centre County, PA. The study included web-based WikiMapping and public meetings, roadway safety audits, multi-modal concept development, and project prioritization for the Township's Capital Plan. The Project Working Group brought together staff from Township planning and public works, regional planning, transit operations, and PennDOT. This session will highlight successes, lessons learned, and educate others on an approach to implementing mobility studies at the local level.

Robert Watts, PE, PTOE, AICP | McCormick Taylor

Ron Seybert, PE | Ferguson Township

Michelle Goddard, AICP | McCormick Taylor

A2. Phoenixville Rising: Addressing Housing Need in a Growing Community

CM | 0.75

Chester County has a growing population and the highest land costs in the Commonwealth, resulting in a tight housing market and decreasing affordability. As a walkable borough with significant amenities, Phoenixville particularly shares these characteristics. Through

community-driven approaches, Phoenixville has proactively worked to be a leader in the development of strategies to address housing related issues. The session will discuss the varied and innovative approaches utilized by the Borough to address housing needs in a more developed community, with time provided for questions.

Chris Patriarca, AICP | Chester County Planning Commission
Libby Horwitz, AICP | Chester County Planning Commission

A3. Zoning for Difficult Land Uses **CM | 0.75**

This session will offer practical recommendations on how to address difficult and controversial land uses through zoning regulations. This will include solid waste uses, mineral extraction, wind turbines, scrapyards, heavy industrial uses, drug and alcohol treatment centers, after hours clubs, adult entertainment uses, illicit massage parlors and other uses. There also will be recommendations for addressing growth of colleges and hospitals near residential areas.

Charlie Schmehl | Urban Research and Development Corp.

Concurrent Education Sessions B

B1. Beyond the Public Meeting: Easy but Effective Tools for Community Engagement **CM | 0.75**

Neighborhood plans should reflect the concerns and priorities of residents but obtaining meaningful input that represents the diverse views of the people who live in a community can be difficult. Public meetings are the most common tool for soliciting feedback from residents and other stakeholders, but they aren't always the most effective and inclusive. Learn about three other methods that were used to engage residents in planning efforts in West Scranton. During this interactive session, you will participate in these activities to witness first-hand how they can be used to engage residents of different ages, races, and socioeconomic backgrounds.

Todd Pousley | NeighborWorks Northeastern Pennsylvania
Nancy O'Neill, AICP | WRT

B2. Reviving Small Town America

CM | 0.75

America's small towns and intermediate cities are facing a crisis. With large manufacturing facilities closing and young people fleeing to pursue education and jobs in cities, the economies of these municipalities are dying. What are realistic ways to enliven these areas, making them economically competitive and be viable places to live, work and raise families? Case studies will show how some communities have responded with programs and strategies from Pennsylvania and surrounding states. Find out how planning strategies can strengthen the economic base of smaller communities while recognizing their authentic differences that make them unique places.

Kimberly Baptiste, AICP | Bergmann Associates
Sean O'Rourke, AIA, LEED AP | Bergmann Associates

B3. Redesigning Transit Systems to Meet the Changing Needs of Riders

CM | 0.75

This presentation will show how transit systems can be redesigned to better meet the needs of riders. After a decade of strong ridership growth, transit ridership began to decline across the country in the mid 2010s. This trend has led to many systems revisit how their transit system's are designed and deployed. This session will explore the various factors related to redesigning transit systems, from basic service planning concepts to the role of emerging technology and micromobility modes. The session will share findings from research from the upcoming TCRP publication, Redesigning Transit Networks for a New Mobility Future. The session will be organized as a round-table discussion which combines a lecture by the session leader with guided discussion. The goal is to have participants share how communities across Pennsylvania are redesigning their transit networks.

Andrew Zalewski, AICP | Foursquare ITP

B4. Legislative Update

NO CM

Legislative Committee will share an update on their activity this year. There will also be discussion on local, state and federal issues impacting Pennsylvania today.

Ed LeClear, AICP | Borough of State College

Concurrent Education Sessions C

C1. How to Select the Best Revitalization Strategies for Your Community

CM | 1.00

This presentation will discuss the various strategies communities can use to attract growth and investment in their downtown areas (such as streetscape and façade improvements, wayfinding signage, traffic calming, etc.). It will also provide guidance on evaluating which strategies make sense for each community's needs. The speaker will present case studies that walk attendees through the process other communities have used to select appropriate revitalization strategies and will offer lessons learned to ensure attendees are successful in implementing their own initiatives.

Laura Ludwig, AICP | Herbert Rowland & Grubic, Inc.
Christina Sarson | Herbert Rowland & Grubic, Inc.

C2. Three Great Plans That Taste Great Together: You've Got Your Bikes, Scooters and Parks in My Social Determinates of Health

CM | 1.00

In an environment with limited budgets and staff, state agencies need to link visions, goals, and action steps across multiple planning documents to achieve success. This session will bring staff together from the Department of Transportation, the Department of Conservation and Natural Resources, and the Department of Health to discuss how the three agencies have collaborated to address the broad issues of equity, health, safety, and access to community resources.

Roy Gothie | PennDOT
Alex MacDonald | DCNR
Justin Lehman | PA Department of Health

C3. A Planner's Guide to Traditional and Nontraditional Preservation Tools

CM | 1.00

This session will present policies and practices, or “tools”, used to improve the protection of historic assets at the local level. The goal of the session is to help planners understand the multiple tools available for protecting historic assets, such as design guidelines, overlays, neighborhood conservation districts, form-focused codes, etc. Attendees should leave with an understanding of the appropriate tool to address their community's unique needs, a basic road map for the implementation of each tool, and case studies that show each tool in action. The session will include Q&A and an interactive activity to further illustrate the goals of the session.

Meredith Johnson | Johnson Planning and Preservation LLC

Concurrent Education Sessions D

D1. Nature: Our Best Tool for Preserving Rural Places

CM | 1.50

Return on Environment (ROE) studies estimate the financial value of open space by measuring avoided costs such as air pollution removal, outdoor recreation revenues, avoided healthcare costs as a result of increased exercise, and increased property values due to proximity to open space. The ROE equips communities to strike an effective balance between maintaining connected, open spaces and supporting smart growth, ensuring a twice green outcome of environmental quality and a sustainable economy. See an online on line interactive ROE mapping application for Lebanon County and hear how Carbon County communities are applying the products by integrating them into local land use codes.

Ann Hutchinson, AICP, MLA | Natural Lands

Jeanne Ortiz | Audubon Pennsylvania

Tom West, AICP | Greener Planning LLC

D2. Pennsylvania Land Use Law Update: Appellate Cases from 2019-2020

CM | 1.50 Law

Appellate Cases will be presented in traditional lecture format as well as interactively with hypotheticals to demonstrate how a recent case decided the outcome. Cases will range from traditional zoning approval cases (variances, special exceptions & conditional uses), zoning interpretation cases and validity challenges, to subdivision and land development cases. Practice points distilled from each will be emphasized.

Charles Suhr, Esq. | Stevens & Lee
Ambrose Heinz, Esq. | Stevens & Lee

D3. Equitable Engagement to Create an Implementable Comprehensive Plan

CM | 1.50 Ethics

A city's comprehensive plan is a way to organize efforts across communities into a common vision and cities are challenged to create equitable engagement across a diversity of neighborhoods. The session will discuss community engagement practices and principles and present the importance of nested scales of engagement, from practices to policies and will discuss the challenges of equitable engagement across diverse communities. As part of the APA CM Ethics Track, the session will discuss how an equitable engagement approach supports the AICP Code of Ethics in ensuring broad community participation with an emphasis on social justice and inclusion. The session will utilize a case study of the comprehensive and economic development plan for Allentown, PA "Allentown Vision 2030" where the City prioritized equitable engagement across a diversity of neighborhoods and demographics and fostered an implementation-focused community planning process.

Hannah Clark | City of Allentown
Christine Mondor, FAIA, LEED AP | evolve environment and architecture
Irene Woodward, AICP | City of Allentown
Jerry Paytas | Fourth Economy Consulting

Concurrent Education Sessions E

E1. Should We Have an Ordinance for That?

CM | 1.25

Municipalities face a wide range of planning and zoning related issues (affordable housing, redevelopment, rural development, short term rentals, bee keeping, comfort animals, etc,) that they attempt to regulate through a range of MPC –enabled tools. TCRPC is currently updating a set of ordinances: or “toolbox” of model ordinances and reference materials to better enable municipalities to address new issues and complex issues in consistent and effective means. The proposed brainstorming session would enable participants to learn from the TCRPC work completed to date and share their experiences with current planning issues and effective regulatory tools, enabling TCRPC to develop the most effective toolkit possible that could be shared across the state.

Steven Deck, AICP | Tri County Regional Planning Commission

Jerry Duke, AICP | Tri County Regional Planning Commission

Betsy Logan, AICP | Susquehanna Township

E2. Planning a Bicycle Network for Downtown Scranton

CM | 1.25

Multimodal transportation is a hot topic in transportation planning. As a vehicle dependent nation, many people are looking for alternative forms of transportation and healthier lifestyles. The Downtown Scranton and Wilkes-Barre Bicycle and Pedestrian Study, commissioned by the Lackawanna Luzerne MPO, explored safe and efficient bicycle networks in the downtown business districts of Scranton and Wilkes-Barre. The project included a heavy public involvement process to help identify where people are traveling from, what their destinations are, how they currently travel, and where they would ideally like to travel. A draft network has been developed and the implementation plan is under way. This session will focus on lessons learned during the study process and how the study team is developing an implementation plan with the client and project partners.

Stephanie Milewski, RLA | Barry Isett & Associates, Inc.

Steve Pitoniak | Lackawanna County Regional Planning Commission

John Petrini | Luzerne County Planning Commission

E3. Scranton-Abingtons Planning Association: Regionalizing City, Town, Suburban and Rural Zoning

CM | 1.25

The session will highlight how the nine municipalities of the Scranton-Abingtons Planning Association boldly came together to prepare a regional comprehensive plan and zoning ordinances. Administered by the Lackawanna County Planning Department, funded by state, county, and local dollars, and assisted by Environmental Planning and Design, this regional planning effort represents a mix of urban, suburban, and rural landscapes, covering ½ the population and 1/5 of the land area of Lackawanna County. The ordinances include land-use sharing, decided by each municipality and a steering committee. Each municipality maintains autonomy administering its piece of this regional zoning puzzle. Attendees will see how this complex project went from an idea to implementation.

Mary Liz Donato | Lackawanna County Regional Planning Commission

Don King, AICP, CFM | City of Scranton

Theodore Ritsick | PA Department of Community & Economic Development

Andrew J. Schwartz, AICP, CUD, PLA LEED AP | Environmental Planning & Design

E4. Calling All Students: What's Your Path Forward?

NO CM

Planning students have many questions: Do I need an internship? How do I get one? What are potential career paths? Do I need a bachelor's degree or master's? Do I want to work in the public or private sector? How do I build a strong resume? Does networking matter? A panel representing different sectors will open the session with discussion of key considerations on these topics. Attendees will be provided significant time for questions and discussion among the full group.

Susan Elks, AICP | Chester County Planning Commission

Concurrent Education Sessions F

F1. Land Use Law Update

CM | 1.50 Law

This session is a review of Pennsylvania and federal court opinions, administrative agency decisions and pending and enacted legislation relating to land use regulation.

Susan Smith, Esq. | The Law Office of Susan J. Smith

F2. Stuck in the Middle: Stabilizing PA Legacy Cities by Investing in Middle Neighborhoods

CM | 1.50

How do we stabilize our legacy cities in Pennsylvania? One approach is to invest in Middle Neighborhoods – areas that are neither thriving downtowns nor impoverished inner cities. Middle Neighborhoods are homes to substantial segments of a city’s population, representing tax/political bases. These racially mixed areas are relatively affordable with residents who are well educated and employed – hence economically mobile. These “middle child” neighborhoods pose risk of population flight and subsequent disinvestment, presenting city-wide economic vulnerabilities. This session will spotlight Middle Neighborhoods in Pittsburgh, Scranton and Philadelphia, using tools like market value analyses to identify unique demographic and housing trends.

Woo Kim, AICP | WRT

Jesse Ergott | NeighborWorks Northeastern Pennsylvania

Jessica Smith Perry | Urban Redevelopment Authority of Pittsburgh

Jacob Rosch | Reinvestment Fund

F3. Building Better Bus Stops

CM | 1.50

All trips on transit buses begin and end at bus stops; making bus stops a vital connection between transit service and the communities served. Learn how to expand access to transit with better bus stop planning and design. Presentations from transit planning experts will provide an overview of the draft Building Better Bus Stops Resource Guide being developed by PPTA and PennDOT, SEPTA's Bus Stop Design Guidelines, and lessons learned from enhancing

bus stops in the Lehigh Valley. Roll up your sleeves and apply your new bus stop planning and design skills during the interactive workshop portion of the session.

Natasha Manbeck, PE, AICP | McMahon Associates, Inc.
Amy Bernknopf | Delaware Valley Regional Planning Commission
Molly Wood, AICP | Lehigh and Northampton Transportation Authority

Concurrent Education Sessions G

G1. ProAct Now: Prepare Your Community for Technological Change

CM | 1.25

Technology is disrupting the social, economic, and environmental fabric of our communities. This session will help planners understand technological trends ranging from artificial intelligence to new mobility and introduce a methodology to help communities manage the impacts. It will begin with an audience flash poll on the community impacts of new technologies. The speakers will then present a scan of emerging technological trends, their present impacts and future implications, and strategies that communities can use to prepare for them. The presentation will be followed by a second flash poll to identify top trends for small-group breakout discussions.

David Rouse, FAICP
Ben Hitchings FAICP, CZO | Green Heron Planning, LLC

G2. Rural by Design

CM | 1.25

In this session there will be a discussion on techniques for conserving rural character as residential and small-scale commercial development occurs. Keynote speaker, Randall Arendt, whose book bears the name of this session, will offer examples of rural conservation from his practice across North America. There will be several Pennsylvania examples. Arendt's work across North America contains rural examples that have conserved biodiversity, scenic views, village character, interconnected greenways and historic landscapes. He will showcase a few of his favorites. Ann Hutchinson will illustrate several rural subdivisions and a commercial center

that posed particular challenges such as ridgeline protection, woodland conservation and small town character preservation.

Ann Hutchinson, AICP | Natural Lands
Randall Arendt | Greener Prospects

G3. AICP: Is This Certification For You? NO CM

Are you interested in becoming a certified planner by taking the AICP exam? Not sure yet? The PA Chapter and its Professional Development Committee are here to help you decide. In this session, speakers will explain the benefits and requirements of certification, the application process, and the format of the exam for those trying to decide if or when to take the exam. For those who have already decided to take the exam, speakers will identify resources available to help prepare for testing. The session will be driven by the needs of attendees, and questions are encouraged.

Alexis Williams, AICP, PP | STV, Inc.
